Carol:

Just touching base on the Phosphate Project. Based on your last email, it looks like we're standing by waiting on comments from FDEP.

I'm not able keep my cell phone with me during the day...something about a static-spark possibly causing an explosion.

I'm checking BB at lunch and email during the evenings. If you need me, just leave a VM or send an email and I'll get back as soon as I can.

Thanks, Brad
